*"Empowering decisions. Driving growth — with data-driven intelligence
and dependable business solutions across Africa."*

COMPANY PROFILE • 2026

Nakuru, Kenya • Company No. PVT-ZQUX89K8

WHO WE ARE

01 Executive Summary

Koimeret Enterprise Limited is a Kenyan company that turns geospatial and operational data into decisions our clients can act on — and backs that intelligence with dependable procurement, supply, and logistics. We serve governments, development partners, NGOs, research institutions, and private enterprise across the Greater Horn of Africa, combining regional expertise with international technical standards.

Geoinformation

Mapping, earth observation, and spatial analysis that make the landscape legible.

Data & Analytics

Pipelines, models, and dashboards that convert raw data into insight.

Digital Solutions

Web platforms, cloud infrastructure, and AI-enabled decision tools.

Business & Supply

Procurement, supply, and logistics that put solutions to work on the ground.

WHY CLIENTS CHOOSE KOIMERET

- ✓ Regional Expertise
- ✓ End-to-End Delivery
- ✓ Cloud-Native
- ✓ Cost-Effective
- ✓ Registered & Compliant

02 Vision, Mission & Values

Vision

To be a trusted African leader in geoinformation and data-driven decision support, while delivering dependable business and supply solutions that help our clients act with confidence.

Mission

To deliver reliable, open, and cost-effective geospatial, data, and business solutions that help organisations understand their environment, manage risk, and operate efficiently.

CORE VALUES

Integrity

Openness

Innovation

Dependability

Impact

03 Our Services

Four connected practice areas — the pillars of our identity — delivered by one accountable team.

Geoinformation & GIS

- Remote sensing & earth observation
- Cartography & thematic mapping
- Spatial databases (PostGIS, STAC)
- Hazard, flood & drought mapping
- Web-GIS & interactive portals

OUTPUTS Maps · Dashboards · Spatial analysis · Decision support

Data & Analytics

- Analysis-ready data pipelines
- Statistical modelling & AI/ML
- Time-series & monitoring systems
- Data visualisation & reporting

OUTPUTS Models · Dashboards · Insight reports

IT & Digital Solutions

- Web & custom applications
- Cloud infrastructure & DevOps
- AI-enabled decision tools
- Capacity building & training

OUTPUTS Platforms · APIs · Cloud systems

Business Solutions

- Sourcing, procurement & tendering
- Logistics & distribution
- Retail & general trade
- Farm inputs & ICT supply

OUTPUTS Supply · Logistics · Fulfilment

04 Our Delivery Process

A disciplined, transparent process that de-risks every engagement — from first conversation to long-term support.

WHAT YOU RECEIVE

05 Solutions We Build

Tangible solutions across both technology and business operations — from data systems to procurement, supply, and logistics pipelines.

07 Why Koimeret

Regional Expertise

Years of practical geospatial and data implementation across the Greater Horn of Africa.

Open Technologies

Open-source and cloud-native approaches that reduce licensing costs and lock-in.

Integrated Delivery

Technology, procurement, and logistics under one accountable partner.

Reliable Partner

A fully registered and compliant Kenyan company you can contract with confidence.

Client Focus

Solutions tailored to your operational realities, not off-the-shelf templates.

End-to-End

From data and systems to the equipment and supply that make them work.

08 Leadership

Hillary Koros
Founder & Director

"We build intelligence that people can act on — and stand behind the delivery, end to end."

Hillary is a geospatial information science researcher and engineer with extensive experience in flood early-warning systems, cloud-native geospatial infrastructure, and climate decision-support across the Greater Horn of Africa. He has consulted for regional and international institutions, contributed to open-source geospatial software, and presented at international forums including the EGU General Assembly.
